Subject: Initial Site Assessment
Bruce Road Widening Project
Chico, CA 95669

Dear Ms. Bromund:

Burleson Consulting, Inc. (Burleson) is pleased to submit this report of our Initial Site Assessment for the Bruce Road Widening Project in Chico, California. The purpose of our services was to characterize the project area right-of-way conditions relative to environmental contamination concerns and to identify obvious, actual, and potential concerns. Our scope of services was described in our proposal dated February 13, 2019.

This report is intended for the use only by ICF, the City of Chico, and the California Department of Transportation. Our services have been performed under mutually agreed upon terms and conditions. If other parties wish to rely on this report, please have them contact us so that a mutual understanding and agreement of the terms and conditions for our services can be established prior to their use of this information.

The findings contained herein are based upon the data that were reviewed and documented in this report along with our experience on similar projects. The discovery of any additional information concerning the environmental conditions at the site should be reported to us for our review so that we can reassess potential environmental impacts and modify our conclusions, if necessary.

We appreciate the opportunity to be of service to you. Please call me at 916-984-4651, extension 111, or via electronic mail at gr@burlesonconsulting.com if you have any questions or if we may be of further service.

Sincerely,

Gregory J. Reller, P.G.
Professional Geologist

EXECUTIVE SUMMARY

Initial Site Assessment Bruce Road Widening Project Chico, California

ICF retained Burleson Consulting, Inc. (Burleson) to perform an Initial Site Assessment (ISA) of the Bruce Road Widening Project, Chico, California, within the County of Butte, California. Our services were provided in general accordance with Burleson's November 2019 proposal. As part of the assessment, Burleson reviewed the site geology and hydrogeology, the site history, environmental regulatory lists, and information obtained during site reconnaissance.

Purpose, Scope, and Deviations

The purpose of Burleson's services was to identify the presence of potential current and historical Recognized Environmental Conditions (RECs) or environmental concerns resulting from practices and activities that currently or historically occurred within the project area. During this assessment, no subsurface investigation was performed. The assessment was conducted in general accordance with the American Society of Testing and Materials, ASTM E 1527-05 "*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*", which meets the objectives of: satisfying the innocent land owner defense under the Comprehensive Environmental Response and Compensation Liability Act (CERCLA), and identifying environmental risk associated with the project area. The following deviations from the ASTM standard include: inspections of structure interiors within the project corridor were not conducted and interviews of property owners were not conducted.

Site Description

The project area consists of approximately 2 miles of right-of-way within the Chico city limits (Appendix A; Figure 1). The project area occurs within a partially developed area along Bruce Road between State Route (SR) 32 and Skyway Road. Bruce Road is a two-lane road that crosses an east-west bicycle path along Little Chico Creek, and parallels an adjacent bicycle path to the east along Dead Horse Slough. The proposed "complete streets" improvements include widening Bruce Road from an existing 2-lane arterial roadway to a 4-lane arterial roadway, and replacing the existing two-lane, functionally obsolete, Bruce Road bridge over Little Chico Creek (Caltrans Bridge # 12C0106) with a new four-lane bridge structure. Additionally, the proposed project would require drainage and storm drain infrastructure improvements. Based on Burleson's historical review and site reconnaissance, the project area has undergone a transition from open grassland/rangeland and agricultural land use to partially developed commercial and residential land use since the 1970s.

Records Review and Historic Review

Burleson contracted Environmental Data Resources (EDR) to perform database search queries of information published by the state and federal regulatory agencies for the project area, adjacent, and surrounding properties. The database search was completed in accordance with ASTM E 1527-05. The database query included search radii up to 1 mile from the project corridor. Based on EDR database records, 13 listings occur within project area. Of the 13 listed, seven facilities or events contain current or historical potential environmental concerns to the project. The remaining EDR records have been determined to be low risk to project activity. The EDR report is located in Appendix C.

Burleson's review of historic aerial photographs and topographic maps indicate that the project area was primarily open rangeland/grassland and agricultural land with the Humboldt Road Burn Dump at Humboldt Road prior to 1969. The project area and surrounding properties began to transition to sparse residential, commercial, and light industrial uses post 1969. Historical aerial photographs reviewed by Burleson document features or properties along the project area from 1941 to 2016 with the longest gap in coverage being 22 years (between 1947 and 1969). Burleson reviewed historical topographic maps of the project area and adjoining properties for the following years: 1891, 1893, 1895, 1912, 1944, 1948, 1949, 1950, 1951, 1969, 1978, and 2012 with the longest gap in coverage being 34 years (between 1978 and 2012).

Site and Area Reconnaissance

The site and area reconnaissance was performed to identify obvious visual indications of present or past activities that have or could impact the project area. Site reconnaissance was conducted on foot and by car. The site and area reconnaissance was conducted by Burleson Principal Geologist, Greg Reller, and Patty Cubanski, Environmental Scientist, on January 24, 2020.

Site reconnaissance included pedestrian surveys of approximately 2 miles of right-of-way within Chico City limits. Reconnaissance confirmed the corridor is located within a partially developed area consisting of intermixed residential, commercial, and light industrial development and undeveloped rangeland/grassland. Inspections were conducted from public rights-of-way. Structure interior inspections were not conducted. Based on the EDR report and records survey, several specific sites of concern were identified and inspected during the site reconnaissance. Identified and inspected sites include Bartig, et al; West Property; Hignall Development; Humboldt Road Burn Dump; Humboldt Road Burn Dump Operational Unit; a "Not Reported" suspected illegal drug lab; and Skyway Gas & Food. Additionally, Burleson inspected the former Serenity Homes 2490 Bruce Road (not listed in EDR database) where Burleson observed an asphalt-concrete pad (likely parking lot) and uneven topography where structures once were. Site reconnaissance locations are presented in Appendix A (Figure 2) and field data forms are in Appendix D.

Data Gaps, Findings, Conclusions, and Recommendations

Property owner interviews were not included in the scope of work for this ISA. Lack of interviews does not appear to present a significant data gap because of the availability of other information to support the necessary evaluations.

Burleson identified one high risk REC (Humboldt Road Burn Dump and associated properties) within the project area with the potential to impact project activity. While the burn dump was remediated, recently planned activities along SR 32 at the north end of the project area include planning measures and regulatory requests to address lead contaminated sediment. Burleson has identified the potential for the project to encounter elevated lead or other heavy metals in soil originating from the Humboldt Road Burn Dump and associated properties.

Burleson recommends that the City of Chico conduct a site investigation consisting of soil sampling to determine if burn ash is present within the project limits. Soil samples from select locations from the project area north of Humboldt Road should be collected for visual examination and laboratory analysis. Analytes should include total and leachable arsenic, lead, and zinc. Soil sampling should be planned in cooperation with Regional Board staff.

1.0 INTRODUCTION

ICF retained Burleson Consulting, Inc. (Burleson) to perform an Initial Site Assessment (ISA) of the Bruce Road Widening Project (project), located in the City of Chico, California within Butte County, California (Appendix A; Figure 1). Our services were provided in general accordance with Burleson's February 13, 2019 proposal. As part of the assessment, we reviewed the site geology and hydrogeology, the site history, environmental regulatory lists, and additional information obtained during our site and area reconnaissance.

City of Chico proposes to reconstruct and widen an approximately 2-mile-long segment of Bruce Road from SR 32 to Skyway Road utilizing roller-compacted concrete pavement. The proposed "complete streets" improvements include widening Bruce Road from an existing 2-lane arterial roadway to a 4-lane arterial roadway, and replacing the existing two-lane, functionally obsolete, Bruce Road bridge over Little Chico Creek (Caltrans Bridge # 12C0106) with a new four-lane bridge structure. The project is in the "Chico, CA" United States Geological Survey (USGS) Quadrangle, between Sections 31 and 32, and 29 and 30, of Township 22 North, Range 2 East. North of Humboldt Road, the project turns to the northwest and enters Section 19 of Township 22 North, Range 2 East. (Appendix A; Figure 2).

Roadway improvements would include construction of the following: a 14-foot-wide landscaped center median; 5-foot-wide buffered bike lanes; dedicated left turn lanes at various intersections; landscaped parkways; concrete curb, gutter, and curb ramps; a 5-foot-wide concrete sidewalk along the east side of Bruce Road; a 12-foot-wide concrete multi-use path on the west side of Bruce Road; and roadway lighting.

The new approximately 96-foot-long by 96.5-foot-wide bridge would accommodate four lanes of traffic, a center median, and pedestrian/bicycle facilities consisting of a Class I bike path on the west side of Bruce Road and a sidewalk on the east side. The new bridge would be a three-span, cast-in-place, reinforced concrete slab superstructure founded on pile-supported abutments and 16-inch diameter multi-column piers supported on spread footings.

The project also includes drainage improvements such as storm drainpipe, manholes, and curb inlets. Two traffic signals are proposed to be installed at the intersections of Raley Boulevard and Webster Drive at Bruce Road. Acquisition of a total of approximately 0.30 acres of right-of-way located on four separate parcels would be required to construct the typical roadway cross-section.

Excavation would be required throughout the project in order to construct the widened roadway, bridge, and associated improvements. The estimated maximum depth of excavation for the roadway improvements is between 1 and 3 feet below existing grade. Excavation for landscaping and drainage facilities, which would require trenching, placement of pipe, drainage structures, landscaping, irrigation, and backfill, would

have a maximum depth of 6 feet. For the bridge structure, a maximum excavation depth of 35 feet would be required to install the abutment piles, which are anticipated to be Cast-In-Drilled-Hole (CIDH) piles.

1.1 Purpose

The purpose of this ISA was to identify the presence of current or historic Recognized Environmental Conditions (REC) or environmental concerns resulting from practices and activities that have occurred within the project area or adjacent sites that could potentially impact the project. Unless otherwise noted, no subsurface investigation was performed as a part of this assessment.

1.2 Scope of Services

The ISA is a non-intrusive, general characterization of environmental concerns to the project area, based on readily available information and visual observations. The assessment was conducted in general accordance with the American Society of Testing and Materials, ASTM E 1527-05 "*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*", which meets the objectives of: satisfying the innocent land owner defense under the Comprehensive Environmental Response and Compensation Liability Act (CERCLA), and identifying environmental risk associated with the project. The scope of services provided by Burleson are summarized below.

1. Performed a site and area reconnaissance and reviewed available topographic maps, published soils reports, geology and hydrogeology information of the target property and/ or general vicinity to assist in characterizing the area surface and subsurface drainage;
2. Reviewed readily available historical documents, including maps, aerial photographs, and previous environmental studies conducted at the site;
3. Reviewed readily available environmental reports published by others, and by state and federal agencies, to determine if the target property or nearby properties are listed as having a present or past REC or environmental condition, are under investigation or are regulated by state, federal, or local environmental regulatory officials;
4. Performed a site and surrounding area reconnaissance to identify obvious indications of present or past activities that have or could have contaminated the site. Any assessment of issues identified as "additional issues" in ASTM E 1527-05 such as asbestos, lead in paint, radon, and lead in drinking water were not performed as part of this assessment; and
5. Prepared this report to present the findings, conclusions, and recommendations.

Burleson's scope of services did not include sampling of the soil and groundwater or other materials in the project area.

1.3 Exceptions, Deviations, and Limitations

The following deviations from the ASTM standard occurred:

- Inspections of structure interiors within the project corridor were not conducted.
- Interviews of property owners were not conducted.

2.0 SITE DESCRIPTION

A consideration of hydrology and hydrogeology are of interest because they provide an indication of the direction that contaminants, if present, could be transported. Burleson reviewed the following information regarding the physical settings and hydrogeology of the project area and the surrounding area:

Table 1. Summary of Physical Setting

Information/Resource	Description
Topographic Map	USGS 7.5-minute series Topographic Map of the 2012 Chico CA Quadrangle
Topographic Map Location	Between Sections 31 and 32, and 29 and 30, of Township 22 North, Range 2 East, and Section 19 of Township 22 North, Range 2 East. Mount Diablo Meridian
Environmental Data Resources, Inc (EDR)	Overview, detail and physical setting mapping and supporting soils and hydrogeological information for the target property, as presented by EDR. The EDR Map with GeoCheck®. Chico Esplanade, Chico, CA 95926. Inquiry Number 5942292.2s January 21, 2020.

2.1 Location and Legal Description

The project area is located in the City of Chico, Butte County, California. The project is located east of State Route (SR) 99 and south of SR 32. The project contains an approximate 2-mile segment of Bruce Road within the City of Chico, extending from Skyway Road on the south, to SR 32 on the north. The project area crosses Little Chico Creek about one-half mile south of SR 32, and parallels Dead Horse Slough near the intersection with SR 32.

2.2 Site and Vicinity Characteristics

The project is in the “Chico, CA” USGS 7.5 Minute Quadrangle, and follows the north-south boundary between Sections 31 and 32, and 29 and 30, of Township 22 North, Range 2 East. North of Humboldt Road, the project turns to the northwest and enters Section 19 of Township 22 North, Range 2 East. Topographic maps indicate the project site elevation varies from approximately 230 feet above mean sea level to the south and west, to about 275 feet to the north. The project area slopes gently downhill from northeast to southwest. The project area crosses, Little Chico Creek, a perennial stream immediately north of Picholine Way and parallels Dead Horse Slough in Section 19. The project consists of mixed undeveloped grasslands, residential, and commercial development.

2.3 Description of Structures, Roads, and Other Site Improvements

The project corridor occurs within a partially developed area (Appendix B; Site Photographs). An existing residential development is located east of Bruce Road, immediately south of Little Chico Creek. Two planned and partly constructed mixed-use development projects are located adjacent to Bruce Road: Meriam Park planned development area and Stonegate subdivision. Bruce Road is a two-lane road that crosses an east-west bicycle path along Little Chico Creek, and parallels an adjacent bicycle path to the east along Dead Horse Slough. The City of Chico proposes to reconstruct and widen an approximately 2-mile-long segment of Bruce Road from SR 32 to Skyway Road from an existing 2-lane arterial roadway to a 4-lane arterial roadway, and replace the existing two-lane, functionally obsolete, Bruce Road bridge over Little Chico Creek (Caltrans Bridge # 12C0106) with a new four-lane bridge structure.

2.4 Area Geology and Hydrogeology

According to the USGS Topographic map reviewed for the project corridor, the elevation of the target property varies from about 230 to 275 feet above mean sea level. Topographic maps reviewed indicate the vicinity of the site has a general gradient to the southwest. Surface water drainage is expected to flow to the southwest, and is likely controlled by existing storm drain systems at developed locations and gullies in undeveloped areas.

According to the EDR report reviewed, the project corridor is located on Cenozoic continental deposits. According to the City of Chico General Plan Update (2010) the project area is underlain by the Red Bluff and Modesto Formations. The Red Bluff Formation is a deeply weathered Pleistocene alluvial terrace deposit. The red-orange colored Red Bluff Formation occurs at the southern half, and northern quarter of the Project. The Modesto Formation is of Pleistocene age, consisting of gravelly sand, silt, and clay. Modesto Formation occurs from the bridge site south to the vicinity of East 20th Street along the project. The soil types expected within the project corridor were obtained from the United States Department of Agriculture Natural Resource Conservation Service (NRCS 2019) and are described in the table below.

Table 2. Soils Characteristics

Soil Component Name	Description
Tuscan Cobbly loam	Very slow infiltration rates. Clayey well drained soils with medium textures. The soil does not meet the requirements for a hydric soil. Soil texture class from 0-17 inches is expected to be cobbly loam; indurated soil is expected from 17 to 22 inches.

The City of Chico is located in the Sacramento River Valley and is approximately 10 miles east of the Sacramento River. The Sacramento River flows in a south/southeasterly direction through the Sacramento River Valley. The City of Chico is located in the north central portion of the Sacramento River Hydrologic Region and the Big Chico Creek watershed and the Little Chico Creek/Butte Creek watershed. Groundwater

in this portion of the Sacramento Valley Groundwater Basin is contained primarily within the pore spaces of the reworked sand and gravel layers of the Tuscan Formation, with much of the groundwater being confined under pressure by layers of impermeable clays, mudflows, or tuff breccia (City of Chico, 2010). Groundwater also occurs in the Modesto Formation.

The project area is located in the West Butte sub-basin of the Sacramento Valley Groundwater Basin (City of Chico 2010). The aquifer system underlying Chico supplies the municipal and agricultural water demands of the city. Approximately 60 percent of the groundwater pumped for the city and most of the stormwater runoff from impervious development returns to either the groundwater system as recharge or the surface water system as runoff.

According to the hydrologic data provided by EDR, one well is located near the project south of Little Chico Creek and west of Bruce Road. This well is reported to be a California Water Service Company supply well (No. 65-01) no well construction details are reported for this well. Depth to groundwater was not reported. Regional groundwater flow is anticipated to be southwesterly based on topography; however, factors such as pumping for irrigation or water supply, and proximity to groundwater recharge sources are known to affect local groundwater flow directions, and the actual groundwater flow direction at the project may vary.

3.0 RECORDS REVIEW

Burleson contracted EDR to perform a database search of information published by the state and federal regulatory agencies for the target property and adjacent and surrounding properties. The database search was completed in accordance with ASTM E 1527-05. EDR's complete report dated January 2020 is included as Appendix C.

Regulatory listings are limited and include only those sites that are known to the regulatory agencies at the time of publication to be contaminated or in the process of evaluation for potential contamination. A copy of the regulatory data obtained and reviewed for this project and a plotted site map of the regulated facilities prepared by EDR is provided in Appendix C.

3.1 Regulatory Listed Facilities

The database search included search radii up to 1 mile from the project corridor. Due to the size of the target property, Burleson requested the search radii to be extended. Since the search radii presented in the EDR report extend from approximately the center of the target property, some of the listed facilities are not accurately described within the EDR report.

3.2 Summary of Listed Records of Concern to the Project

Based on EDR database records, 13 listings occur within project area. Of the 13 listed, seven facilities or events contain current or historical potential impacts to the project. The remaining EDR records have been determined to be low risk to project activity. Potential database results of concern that occur within the project corridor are summarized in Table 3, and discussed below.

Table 3. Regulatory Listed Facilities within the Project Corridor

Site Name	Site Address	Databases	Site Summary
Bartig, et al	Bruce Road and SR 32	CPS-SLIC, CERS	Proposed development near Humboldt Road Burn Dump, Case Closed
West Property	Bruce and Humboldt Roads, SR 32	ENVIROSTOR	Property sampled by DTSC in 1990 with no excess levels of contaminants detected. Additional assessment necessary for land use change.
Hignall Development	Bruce Road	ENVIROSTOR, VCP	Lead Contamination
Humboldt Road Burn Dump	Bruce and Humboldt Roads, SR 32	RESPONSE, ENVIROSTOR, Cal-Site,	Landfill/Burn Dump
Humboldt Road Burn Dump Operational Unit	Humboldt Road and Bruce Road	CPS-SLIC, CERS	Burn Dump, Case Closed
Not Reported	Bruce Road at Picholine Way	CDL	Illegal Drug Lab
Skyway Gas & Food	1199 Skyway	UST, HAZNET, RCRA NonGen/NLR, FINDS, ECHO, CERS HAZ WASTE, CERS TANKS, CUPA, EMI, CERS	Gas Station, No documented release, Equipment compliance violations

CDL = Clandestine Drug Labs

UST	=	Underground Storage Tank
VCP	=	Voluntary Cleanup Program Properties

Bartig Et Al Property

The Bartig property was listed on the following databases in the EDR report:

- CPS-SLIC
- CERS

The listed property is located at Bruce Road and SR 32 (APN 002-180-084) and is crossed by the project. The regulatory information did not identify a past land use that may have caused contamination. Potential contaminants of concern were identified as metals/heavy metals and arsenic. The Facility Status indicates completed-Case Closed by the Central Valley Regional Water Quality Control Board.

West Property

West Property was listed on the following databases in the EDR report:

- ENVIROSTOR

The listed site is located at Bruce and Humboldt Roads, near SR 32 within the project area. The regulatory information reported did not identify a past land use that may have caused contamination, potential contaminants of concern, or potential media affected. In December 1990, DTSC sampling did not yield any results that indicated excess levels of contaminants. ENVIROSTOR noted that additional assessment was necessary for land use change.

Hignell Development

The Hignell Development property was listed in the following EDR databases:

- ENVIROSTOR
- VCP

This site is located at Bruce Road within the project area. EDR databases report the site is a voluntary cleanup with the potential contaminants of concern identified as lead and arsenic. The site is located downstream of the Humboldt Road Burn Dump. In 2001 DTSC believed that the Humboldt Road Burn

Dump would not pose a significant health threat to residents of the development and made a Border Zone Determination that no further action was required with respect to investigation or remediation of the site

Humboldt Road Burn Dump

Humboldt Road Burn Dump was listed in the following EDR databases:

- RESPONSE
- ENVIROSTOR
- Cal-Site

The listed site is located at Bruce and Humboldt Roads, near SR 32 within the project area. databases reviewed by EDR report the site as a source of lead contamination to soil and sediment on the property. Other metals and chemicals detected in on property soil include arsenic, antimony, dieldrin, and dioxin. According to the database records, the site was an active landfill from the early 1900s to 1965. Smaller scale illegal dumping is believed to have continued at the site past 1965. There is an unknown depth of soil covering the landfill and there are multiple exposed disposal piles scattered over 13 parcels. Excavation occurred during road construction through the site in 1982 and a sewer system was installed in 1986. The landfill area is currently fenced with the intent to limit direct contact of humans and livestock to the soils. EDR databases report multiple properties for this site including: Humboldt Road Burn Dump Area 8, Drake-Simmons-Simmons-Chico-Baldwin (HRBD Area 8), Drake-Simmons-Simmons Properties (HRBD Area 7), and HRBD Areas 7 & 8 Drake Simmons.

Humboldt Road Burn Dump Operational Unit

Humboldt Road Burn Dump Operational Unit was listed in the following EDR databases:

- CPS-SLIC
- CERS

The listed site is located at Bruce Road and Humboldt Road and occurs within the project area. EDR databases report the site as a Burn Dump/Disposal Site that has been remediated and closed as of February 7, 2006. Potential contaminants of concern at the site consisted of heavy metals in soil.

Unnamed Illegal Drug Lab

The unnamed illegal drug lab was listed in the following EDR databases:

- CDL

This site is located on Bruce Road at Picholine Way within the project area. EDR databases report the site having been the location of an illegal drug lab or had drug lab equipment and/or materials stored on site in 2003. No additional information is reported.

Skyway Gas & Food

Skyway Gas & Food was listed in the following EDR databases

- UST
- HAZNET
- RCRA NonGen/NLR
- FINDS
- ECHO
- CERS HAZ WASTE
- CERS TANKS
- CUPA
- EMI
- CERS

This site is located at 1199 Skyway at the corner of Bruce Road. This site is a gas station with associated convenience store. There are no records of spill violations.

4.0 HISTORICAL REVIEW

Burleson reviewed the following available information in order to ascertain the historical uses of the project area and the immediate adjacent properties to evaluate activity posing potential environmental concerns:

Table 4. Historical Resources Reviewed

4.1 PREVIOUS SITE USE

Burleson's review of aerial photographs, topographic maps, and city directories depicted the project area transitioning from rural agricultural/residential areas to intermixed suburban residential and commercial parcels.

Aerial Photographs. Historical aerial photographs are valuable for the environmental assessor to review features or properties along the project area over a long period of time. Burleson reviewed historical aerial photographs provided by EDR. Historical aerial photograph reviewed include the years 1941, 1947, 1969, 1984, 1998, 2006, 2009, 2012, and 2016, with the longest gap in coverage being 22 years (between 1947 and 1969).

1941. The 1941 aerial photograph depicts the project area as primarily rangeland/grassland with a creek and riparian area through the northern portion and drainages throughout the area. The project area includes the northern segment of Bruce Road (north of E 20th Road) and Humboldt Road. In the surrounding area there are ranch style structures located just north of Little Chico Creek and at the intersection of E 20th Road and Bruce Road. Just south of Little Chico Creek there appears to be a narrow agricultural field east of Bruce Road. Just north of the intersection of Humboldt Road and Bruce Road there appears to be exposed disturbed ground.

1947. The 1947 aerial photograph depicts an increase in agricultural activity along Bruce Road and north of E 20th Road which includes row crops and an orchard. Additionally, the Humboldt Road Burn Dump is

well defined. The majority of the southern segment of the project area is primarily rangeland/grassland with sinuous dirt roads/paths/drainages through the area.

1969. The 1969 aerial photograph depicts the surrounding properties similarly to the 1949 aerial photograph with the exception that SR 32 and Skyway are constructed and that roads for development west of the project area have been built. A structure is located just south of Little Chico Creek and west of Bruce Road. This structure appears to be associated with two tall vertical features (antennae?). The orchards just south of the creek and east of Bruce Road were expanded compared with 1947.

1984. The 1984 aerial photograph depicts a slight shift in the land use of the surrounding areas. Warehouses have been erected south of Skyway and single-family residences have been erected east of Bruce Road. The southern segment of Bruce Road has been extended south to Skyway Road. The remaining land use and land cover appears to have remained the same since the 1969 aerial photograph.

1998. The 1998 aerial photograph depicts an increase of residential development in the project area where there were formerly orchards. Additionally, the Humboldt Road Burn Dump appears to have been consolidated, and Bruce Road was extended north through the former dump footprint to SR 32. Raley Boulevard is constructed. E 20th Road is extended west from Bruce Road. Picholine Way is present south of Little Chico Creek and across Bruce Road from the antenna(?) facility.

2006. The 2006 aerial photograph depicts an increase in single family-homes along E 20th Road. Landfill caps were placed on the Humboldt Road Burn Dump. On the southern segment of Bruce Road there is an increase of industrial and commercial buildings near Skyway and Raley Boulevard.

2009. The 2009 aerial photograph depicts the surrounding properties similar to the 2006 aerial photograph.

2012. The 2012 aerial photograph depicts the surrounding properties similar to the 2009 aerial photograph with the exception of an additional small single-family home development just north of Little Chico Creek east of Bruce Road, and road infrastructure west of Bruce Road.

2016. The 2016 aerial photograph depicts the surrounding properties similar to the 2012 aerial photograph with the exception of the demolition of a commercial property just north of Skyway on Bruce Road, additional houses north of Little Chico Creek and near the intersection of Bruce Road and E 20th Road, construction of the Courthouse just west of Bruce Road, and road infrastructure for residential development near SR 32.

Topographic Maps. Historical topographic maps provide an overview of the area relative to potential previous land uses. Burseson reviewed historical topographic maps of the project area and adjoining

properties for the following years: 1891, 1893, 1895, 1912, 1944, 1948, 1949, 1950, 1951, 1969, 1978, and 2012 with the longest gap in coverage being 34 years (between 1978 and 2012). Information from review of these maps is generally consistent with the information gathered in the historic aerial photograph review.

1891. The 1891 30-minute Chico Quadrangle topographic map depicts the project area and surrounding properties as vacant open land. There are three unnamed roads with east/west orientations and two roads with north/south orientation. The north/south road appears to share the footprint of the current Bruce Road north of E 20th Street. There is indication of two structures along the southern side of the southernmost east/west road. Horse Slough, Little Chico Creek, and Edgar Slough (from north to south) are shown near the project area. The topographic elevation data indicates the project area is primarily level.

1893. The 1893 30-minute Chico Quadrangle topographic map depicts the project area and surrounding properties similarly to the 1891 topographic map.

1895. The 1895 30-minute Chico Quadrangle topographic map depicts the project area and surrounding properties similarly to the 1891 topographic map.

1912. The 1912 7.5-minute Durham/Keefers Quadrangle topographic map indicates the project area and surrounding properties have undergone a transition in land use from the 1895 topographic map. Residential structures represented by squares and additional roads have been constructed along the boundaries of the project area near Little Chico Creek. Little Chico Creek is labelled and crosses the project area approximately 0.4 mile south of Humboldt Road. In the project area approximately 0.25 mile south of Little Chico Creek, an unpaved road creates a “T” intersection with a north/south oriented road (the unpaved road is on the eastern side of the north/south road). Just south of the project area is Crouch Ditch and Centerville Road. The map provides more detailed topographic elevation data than previous maps with the project area elevation between 225 to 270 feet and revealing a decrease in elevation to the south in the project area.

1948. The 1948 7.5-minute Chico Quadrangle topographic map depicts the project area and surrounding properties similarly to the 1912 topographic map with the exception that the north/south road is now labeled as Bruce Road and approximately 0.5 mile south of Little Chico Creek, Bruce Road jogs to the east approximately 0.5 mile. A new drainage is identified within the project area approximately 0.25 mile south of the Bruce Road jog. Structures are no longer shown within or immediately adjacent to the project area

1949. The 1949 7.5-minute Chico Quadrangle topographic map depicts the project area and surrounding properties similar to the 1948 topographic map.

1950. The 1950 7.5-minute Chico Quadrangle topographic map depicts the project area and surrounding properties similar to the 1949 topographic map.

1969. The 1969 7.5-minute Richardson Springs and Chico Quadrangle topographic map shows fewer elevation contour lines and additional roads since 1950/1951. New roads include SR 32 along the northern boundary of the project area and Skyway along the southern boundary. Additionally, residential roads were constructed approximately 0.25 miles west of the jog in Bruce Road. The residences that were present in the 1912 map near Little Chico Creek are depicted in this topographic map

1978. The 1978 7.5-minute Chico Quadrangle topographic map depicts the project area and surrounding properties similar to the 1969 topographic map with the exception that residences (seen as solid dots) are present along the new residential roads and another residence was constructed along the project area just north of Little Chico Creek.

2012. The 2012 7.5-minute Richardson Springs and Chico Quadrangle topographic map depicts a significant change to the landscape within and surrounding the project area. Overall within the project area there is an increase in the density of residential roads and Bruce Road, which is shown with a straight north/south orientation, and connecting to SR 32 and to Skyway. An increase in residential roads is observed east of Bruce Road and north of E 20th Street, and West of Bruce Road and south of E 20th Street. There are seven new intersections along the project area with the majority in the northern half of the project area. Near the southernmost portion of the project area, Raley Boulevard dead ends at Bruce Road.

City Directory Report. The City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5-year intervals. EDR digital archives contained listings for three properties within the project area: vacant land that was since developed as housing at 1889 Bruce Road, The Skyway Tools Center at 2499 Bruce Road, and Serenity Homes formerly located at 2490 Bruce Road.

4.2 PREVIOUS SURROUNDING SITE USE

Review of aerial photographs and topographic maps of the surrounding area depicted similar site use as within the project area. Historically, the surrounding area transitioned from rural agricultural/residential areas to increased urban residential and commercial parcels. Based on historic topographic maps and aerial photographs, the surrounding area began transitioning from rural agricultural properties to urban expansion

in the early 1970s. The topographic elevation data indicates the surrounding area slopes from northeast to southwest.

4.3 SUMMARY OF PREVIOUS ENVIRONMENTAL INVESTIGATIONS

Humboldt Road Burn Dump.

The Humboldt Road Burn Dump (burn dump) was located at the intersection of Bruce Road and Humboldt Road, and extended toward SR 32 along Bruce Road and Dead Horse Slough. The burn dump operated from the early 1900s through the 1960s resulting in the accumulation of metal and glass debris, and ash across the burn dump site. Contaminants present at the burn dump were metals, in particular lead.

The EDR databases identified the following sites associated with the burn dump:

- Bartig, et al
- Hignall Development
- West Property
- Humboldt Road Burn Dump Operational Unit

Hignall Development, West Property, and Bartig, et al have been investigated for lead contamination associated with the Humboldt Road Burn Dump. DTSC noted in 1990 that additional investigation is necessary to support future land use changes at the West Property. DTSC made a borderland determination in 2001 that no additional investigation or remediation was necessary at the Hignall Development property. In 2005 burn ash and waste debris were removed from the Bartig, et al property, the remaining residual metal concentrations were less than established remedial action goals.

Plans developed in 1987 to support Bruce Road widening show that material was present along the right-of-way that was unsuitable for street construction and would need to be removed prior to road construction. (Rolls, Anderson, and Rolls 1982, approved June 10, 1987). The material was shown as being present from Humboldt Road to about 0.2 miles to the northwest.

Humboldt Road Burn Dump documents show that the site was investigated during the 1990s and early 2000s, and remediation was completed during 2006 (Regional Board 2009). The Regional Water Quality Control Board—Central Valley Region issued a Certificate of Completion to the City of Chico in 2006 stating that site investigation and remediation were satisfactorily completed, remedial action standards and objectives were achieved, and that City of Chico complied with all state and local requirements applicable to the Site Investigation and Remedial Action.

In 2006 and 2010, in preparation for widening a box culvert at SR 32 and Dead Horse Slough, City of Chico collected sediment samples from around the box culvert (Regional Board 2015). Sample analytical results included some elevated lead concentrations. In 2010, City of Chico prepared a removal action work plan to guide removal of about 100 cubic yards of sediment from around the box culvert. In 2015 Regional Board issued a conditional no further action required letter for the widening of SR 32 at Bruce Road. The conditions being that City of Chico conduct any sediment removal in accordance with the removal action work plan and that City of Chico notify Regional Board within 30-days prior to any fieldwork related to the SR 32 widening project.

During a November 22, 2019 telephone call Dr. Andy Kopania described observations he made during the 2006 remediation of the Burn Dump. Dr. Kopania recalled that the excavation extended to the edge of the Bruce Road right-of-way, and that burn ash was observed remaining under the road. Dr. Kopania stated that excavation during future widening of Bruce Road could encounter burn ash.

5.0 SITE AND AREA RECONNAISSANCE

The site and area reconnaissance was performed to identify obvious visual indications of present or past activities that have or could impact the project area. Site reconnaissance was conducted on foot. The site and area reconnaissance was conducted by Burleson Principal Geologist Greg Reller and Patricia Cubanski, Environmental Scientist, on January 24, 2020. Maps, which illustrate the general location and configuration of the site are located in Appendix A and presented as Figures 1 and 2. Inspected locations are included on Figure 2. Site and area reconnaissance photographs are provided in Appendix B.

5.1 Site Reconnaissance

Site reconnaissance included pedestrian surveys of approximately 2 miles of right-of-way within the Chico city limits. The project area is located within a mixed-use area consisting of residential, commercial, and undeveloped land. Inspections were conducted from public rights-of-way. Building interiors were not inspected. Some exterior areas, not readily visible from the public right-of-way, were not inspected. Based on the EDR report and reconnaissance observation, specific sites of concern were identified and inspected during the site reconnaissance and included the following locations:

- **Humboldt Road Burn Dump:** The Humboldt Road Burn Dump was located along Bruce Road between Humboldt Road and SR 32. The property was used as a burn dump from the early 1900s to the 1960s, and was remediated in 2006. The burn dump site was located across APNs 002-180-083,087,088,089, and 095, adjoining Bruce Road to the south and west; and APNs 002-180-084,086, and 011-030-136,137, and 015, and 011-780-018 adjoining Bruce Road to the north and east. Burleson observed

areas of fill associated with recent construction adjacent to Bruce Road, the landfill constructed during remediation of the burn dump (Appendix B, Photograph 1), landscaping along Native Oak Drive, and features such as vault covers associated with utilities (water, electrical, and telecommunications) (Appendix B, Photograph 2).

- Undeveloped Land North of Little Chico Creek and East of Bruce Road: Burleson observed an old water well adjacent to a utility pole about 50 feet north of the creek and 50 feet east of the pavement. The well consisted of an approximate 6-inch diameter steel pipe with a welded steel cover (Appendix B, Photo 3). About 130 feet north of the well Burleson observed a concrete structure with iron pipes protruding from the surface (Appendix B, Photograph 4). The concrete structure may have been part of a former cattle loading facility.
- Former Serenity Homes 2490 Bruce Road. Burleson observed an asphalt-concrete pad and uneven topography (pits and mounds) (Appendix B, Photograph 5) on land adjacent to the west side of Bruce Road. The pad was painted as for a parking lot.

5.2 Interview

A conference call was held on November 22, 2019. Participants included a representative of the City of Chico, Claire Bromund of ICF, Greg Reller of Burleson Consulting, and Dr. Andy Kopania. Dr. Kopania prepared and implemented the remediation work plan for the Humboldt Road Burn Dump, and prepared a removal action work plan for managing sediment anticipated to be removed during widening of SR 32 where it crosses Dead Horse Slough. Dr. Kopania was present during excavation of the burn ash. He recalled that excavation to remove burn ash during remediation extended to the edge of the Bruce Road right-of-way, and that burn ash was visible in place beneath the right-of-way. Dr. Kopania stated that it is likely that excavation associated with widening Bruce Road could encounter burn ash.

5.3 Known Current and Past Uses of the Site and Adjoining Properties

The project area was historically rural with very few agricultural residences prior to the onset of urban expansion of the City of Chico. After the early 1970s, a gradual increase in commercial and suburban residential development occurred. The area currently consists of a mixed residential and commercial development, and undeveloped grassland crossed by riparian corridors along Little Chico Creek and Dead Horse Slough. The northern portion of the project from SR 32 to the vicinity of Humboldt Road was used as a burn dump from the 1920s to the 1960s.

5.4 Utilities and PCBs

Typical municipal utilities such as water, sewer, electrical, telecommunications cable, and residential gas are present as above ground and below ground utilities. Pole-mounted transformers were observed along the project corridor. While no evidence for leaking was observed, the possibility that transformers containing PCBs may have been present within the area exists (markings related to PCB content were not visible).

6.0 DATA GAP ANALYSIS

ASTM E 1527-05 requires ISA documents to list potential data gaps encountered during investigation efforts. The standards include identification of all data gaps that affect the validity of the investigative conclusions and discussion of the significance of the gaps. For this project, the following items may constitute a data gap as defined by ASTM:

- Lack of property owner interviews

Interviews were not included in the scope of work for this ISA. Lack of interviews does not present a significant data gap because of the availability of other information to support the necessary evaluations.

7.0 FINDINGS

Burleson conducted this ISA of a proposed project along Bruce Road from Skyway Road north to SR 32. The ISA was performed and prepared in general compliance with the scope and limitations of ASTM Practice E 1527-05. All modifications or exceptions to the general compliance are described previously in this report.

Burleson identified one site as an area of potential environmental concern. Humboldt Road Burn Dump, operated at the vicinity of the intersection of Humboldt and Bruce roads from the 1920s to the 1960s. While the burn dump was remediated, recently planned activities along SR 32 at the north end of the project include planning measures and regulatory requests to address lead contaminated sediment. In addition, burn ash was reported as remaining within subsurface soil within the Bruce Road right-of-way after remediation was complete. Due to historic evidence, proximity to project related construction activity, and the level of ground disturbing activity anticipated as part of the project in this vicinity (excavation up to 6-feet depth), Burleson has identified the site as a **high-risk REC**;

8.0 CONCLUSIONS

Burleson identified one potential high risk REC within the project area with the potential to impact project activity. The findings and results of this ISA concludes with the following statement required by ASTM E 1527-05:

Burleson has performed an Initial Site Assessment in general conformance with the scope and limitations of ASTM E 1527-05 of the project area, defined as an approximate 2-mile segment of Bruce Road within the City of Chico between Skyway Road and SR 32. The project is in the "Chico, CA" USGS Quadrangle follows the north-south boundary between Sections 31 and 32, and 29 and 30, of Township 22 North, Range 2 East. North of Humboldt Road, the project turns to the northwest and enters Section 19 of Township 22 North, Range 2 East. Any exceptions to or deletions from these practices are described in previous sections of this report. This report has revealed evidence of RECs in connection with the project corridor.

9.0 RECOMMENDATIONS

Recommendations pertaining to this ISA have been developed by investigative procedures described in *Scope of Services, Exceptions, Deviations, and Limitations* sections of this report.

Burleson recommends that the City of Chico conduct a site investigation consisting of soil sampling to determine if burn ash is present within the project limits. Soil samples from select locations in the project area north of Humboldt Road should be collected for visual examination and laboratory analysis. Analytes should include total and leachable arsenic, lead, and zinc. Soil sampling should be planned in cooperation with Regional Board staff.

10.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Burleson declares, due to our professional knowledge, we meet the definition of environmental professional as defined in Section 312.10 of 42 C.F.R. Part 312. This ISA was conducted under the supervision of a qualified environmental professional.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. Burleson developed and performed all service in conformance with standards and practices set forth in 40 C.F.R. Part 312.

The preceding report has been prepared in general conformance with standard industry practice including the applicable portions of the investigation procedures codified in ASTM E 1527-05, *Standard Practice for Environmental Site Assessments: Environmental Site Assessment Process*. The end user of this report may rely on the contents, findings, and conclusions to be accurate within the limitations stated in this report and in the ASTM standard. The report also complies with specific requirements supplied by the client.

Gregory J. Reller

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL..... National Priority List
Proposed NPL..... Proposed National Priority List Sites
NPL LIENS..... Federal Superfund Liens

Federal Delisted NPL site list

Delisted NPL..... National Priority List Deletions

Federal CERCLIS list

FEDERAL FACILITY..... Federal Facility Site Information listing
SEMS..... Superfund Enterprise Management System

Federal RCRA CORRACTS facilities list

CORRACTS..... Corrective Action Report

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

Federal RCRA generators list

RCRA-LQG..... RCRA - Large Quantity Generators

Federal institutional controls / engineering controls registries

LUCIS..... Land Use Control Information System
US ENG CONTROLS..... Engineering Controls Sites List
US INST CONTROL..... Sites with Institutional Controls

State and tribal leaking storage tank lists

INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

State and tribal registered storage tank lists

FEMA UST..... Underground Storage Tank Listing

EXECUTIVE SUMMARY

INDIAN UST..... Underground Storage Tanks on Indian Land

State and tribal voluntary cleanup sites

INDIAN VCP..... Voluntary Cleanup Priority Listing

State and tribal Brownfields sites

BROWNFIELDS..... Considered Brownfields Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

SWRCY..... Recycler Database
HAULERS..... Registered Waste Tire Haulers Listing
INDIAN ODI..... Report on the Status of Open Dumps on Indian Lands
ODI..... Open Dump Inventory
DEBRIS REGION 9..... Torres Martinez Reservation Illegal Dump Site Locations
IHS OPEN DUMPS..... Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL..... Delisted National Clandestine Laboratory Register
Toxic Pits..... Toxic Pits Cleanup Act Sites
US CDL..... National Clandestine Laboratory Register
PFAS..... PFAS Contamination Site Location Listing

Local Land Records

LIENS..... Environmental Liens Listing
LIENS 2..... CERCLA Lien Information

Records of Emergency Release Reports

HMIRS..... Hazardous Materials Information Reporting System
CHMIRS..... California Hazardous Material Incident Report System
MCS..... Military Cleanup Sites Listing
SPILLS 90..... SPILLS 90 data from FirstSearch

Other Ascertainable Records

FUDS..... Formerly Used Defense Sites
DOD..... Department of Defense Sites
SCRD DRYCLEANERS..... State Coalition for Remediation of Drycleaners Listing

RGA LUST..... Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/25/2019 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.75 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/16/2019 has revealed that there are 3 RCRA-SQG sites within approximately 0.5 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA-VSQG site within approximately 0.5 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/28/2019 has revealed that there are 8 ENVIROSTOR sites within approximately 1.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 SWEEPS UST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there are 34 RCRA NonGen / NLR sites within approximately 0.5 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 08/12/2019 has revealed that there are 15

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there is 1 DRYCLEANERS site within approximately 0.5 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2017 has revealed that there are 5

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 10/21/2019 has revealed that there are 23 CERS sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.375 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.375 miles of the target property.

Registry ID: 110070092749

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Name: VALLEY OAK SUBDIVISION
Address: BRUCE AND HUMBOLDT ROAD
City,State,Zip: CHICO, CA 95928
Site ID: 545823
CERS ID: 824438
CERS Description: Construction Storm Water

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-09-2016
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: site is inactive at time of inspection, some areas that have been hydroseeded have adequate vegetative cover while some areas are still lacking adequate cover, additional ESC BMPs have been deployed in response to the City of Chico MS4 folks requesting better ESC BMP deployment. Discussed this with QSD and he stated that the storm water quality testing is below the NALs for turbidity and thus felt that the site was compliant with the CGP but they went ahead and deployed even more robust ESC BMPs in response to the City of Chico MS4 folks, site is generally in compliance with CGP/WQC, recheck later during rainy season
Eval Division: Water Boards
Eval Program: CONSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-24-2015
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: inspection to verify that flow from Dead Horse Slough has ceased to cross entrance road so that Discharger can finish arch culvert over Dead Horse Slough, verified that flow has stopped, okay to continue work, dewatering plan is acceptable.
Eval Division: Water Boards
Eval Program: CONSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-27-2014
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Site is shutdown at time of inspection with no activity, many areas

that have been seeded show minor/moderate vegetative growth, all stockpiles are covered, site has an effective combination of ESC BMPs and it appears that there are multiple layers of sediment control BMPs protecting Dead Horse Slough that runs on the southern boundary of the development, no visible signs of sediment reaching the receiving water.

Eval Division: Water Boards
Eval Program: CONSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-26-2015
Violations Found: No

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: minor grading work occurring at eastern most area of subdivision for a water tank installation, veg cover has become better established since prior inspection, project proponent needs to dewater area of Dead Horse Slough that has foundation poured for an arch culvert to finish WQC aspect of project, waiting on ACOE to approve dewatering plan proposed by NorthStar Engineering. Straw wattles and sand bags are being utilized in series to protect Dead Horse Slough in concert with a vegetated undisturbed swath of land. Observed no sediment discharge into Dead Horse Slough, both sediment retention ponds are dry yet there was sediment accumulation in both of the ponds indicating that they are working as planned. Site is generally in compliance with CGP/WQC, recheck again during rainy season.

Eval Division: Water Boards
Eval Program: CONSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-01-2014
Violations Found: No

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Western side of facility CGP routine inspection, site is shutdown at time of inspection with no activity, many areas that have been seeded show moderate vegetative growth, there are multiple layers of sediment control protecting Dead Horse Slough which is running with water at this time there are no visible signs of sediment reaching the receiving water. Site is generally in compliance with CGP.

Eval Division: Water Boards
Eval Program: CONSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-13-2014
Violations Found: No

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Site is active with heavy equipment trenching underground utilities, many areas that have been seeded show moderate vegetative growth, there are multiple layers of sediment control protecting Dead Horse Slough which has ponded water but no continuous flow at this time; there are no visible signs of sediment reaching the receiving water. Site is generally in compliance with CGP.

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	09-25-2013
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Mass grading still occurring, south side of property abuts Dead Horse Slough. Minimal sediment controls deployed. No erosion controls deployed at this time. High potential for sediment release to receiving waters. Informed QSD Lowe of concerns. Will schedule reinspection closer to rainy season.
Eval Division:	Water Boards
Eval Program:	CONSTW
Eval Source:	SMARTS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	08-09-2018
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Facility is generally in compliance, minor deficiencies noted such as soil stockpile was not covered and had no perimeter protection on south/western entrance location. Concrete washout needs refreshing and concrete waste spillage should be cleaned up and properly disposed off. Streets are clean, sidewalks are clean. Drop inlets have appropriate protection. Conduct another inspection during rainy season.
Eval Division:	Water Boards
Eval Program:	CONSTW
Eval Source:	SMARTS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	08-20-2015
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Routine CGP inspection/WQC inspection, bridge over Dead Horse Slough has been finished but wing wall RSP still needs to be completed, crews will be in later this month to start road paving and ESC BMP deployment in preparation for rainy season start. Site is generally in compliance with CGP/WQC, recheck later during rainy season.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

Background Info:	The Humboldt Road Burn Dump (Site) is located on approximately 157 acres near the intersections of Bruce Road, Humboldt Road and Highway 32 in Chico, California. The City of Chico owned and operated the landfill/burn dump from the early 1900s to approximately 1965 when the Butte County Neal Road landfill was

opened. Smaller scale illegal dumping is believed to have continued at the Site beyond 1965.

Not reported

The Site consists of a primary disposal area, which has been covered with an unknown depth of soil, and other exposed disposal piles scattered over 13 parcels. Excavation and grading occurred through portions of the Site in 1982 related to installation of a sewer system and in 1986 related to the extension of Bruce Road. The Site is now bisected by Bruce Road with portions extending 700 feet west of Bruce Road and 4000 feet east of Bruce Road. Undeveloped and open rangeland are the predominant land uses surrounding the Site, with residences approximately 1500 feet away and a junior high school within 2000 feet.

Not reported

The south branch of Dead Horse Slough is the principal drainage for the Site. It originates in the foothills east of Chico, and flows into Little Chico Creek approximately 2 miles west of the Site. Little Chico Creek passes through the urban center of the City of Chico. Dead Horse Slough is an intermittent stream which meanders through the landfill refuse and contamination.

Not reported

DTSC issued Fence and Post Orders to current owners of the land where the landfill once operated and to adjacent landowners who's property is believed to have been effected by lead from the landfill. Those properties are now fenced and the owners are obligated to maintain the fencing. The intent of the fencing is to limit direct contact of humans and livestock to soil that has significantly elevated lead concentrations.

Not reported

Analysis of soil samples collected from the Site indicated that lead is the primary contaminant of concern with elevated levels throughout the entire Site. Other chemicals detected in soil include arsenic, antimony, dieldrin (a pesticide) and low concentrations of dioxin.

Not reported

At the request of the City of Chico, the HRBD is being investigated and remediated in accordance with the Site Designation Process under Assembly Bill (AB) 2061. Pursuant to AB 2061 the Central Valley Regional Water Quality Control Board (RWQCB) has been designated as the Administering Agency for coordinating and administering all state and local laws, ordinances, regulations, and standards governing the response to hazardous substances releases. DTSC, as a support agency under AB 2061, is providing technical and process consultation to the Administering Agency. At the request of the RWQCB, DTSC is also providing public participation and toxicology support.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 369129
Site Name: New North Butte County Courthouse Judicial Council of California#04-F1
Violation Date: 06-27-2016
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to prepare and implement a Spill Prevention Control and Countermeasure (SPCC) Plan.
Violation Notes: Returned to compliance on 07/20/2018. New facility. Need to submit Tier I plan. Total of 2872 gallons of petroleum on site. Return to Compliance: Prepare and implement SPCC. Update 7/26/16: Spoke with Sandy Baker PE FPE Manager for Commercial Facilities Services (oversees the facility). She indicated that the Judicial Council of California (JCC) is requesting a sixty day extension to comply with the violation due to the need to put in secondary containment that the Tier I Qualified Plan requires. The new comply by date would be 9/25/16.

Eval Notes: Consent to perform the inspection, review documents, copy documents, take photos or collect samples provided by Justin Fishell at 9:15 AM on 7/20/2018. No photographs, copied documents or samples were obtained during this inspection. The facility's previous violations have been closed. However, per your engineered SPCC plan, there are several issues that need to be addressed to be in full compliance. On page 32 of your SPCC plan there is a table labeled G recommendations, these must be completed in order to be in full compliance. For inspections, you will also need to be sure you perform an annual inspection in addition to the monthly inspections as outlined on page 22. Using the date that the plan was signed by management, you had six months to implement the plan. The six months will be concluded 8/22/2018 at which time you will be in violation of not implementing the SPCC plan and will be cited for failure to implement your SPCC plan. Please review your [Truncated]

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID: 68319
Site Name: SKYWAY GAS & FOOD
Violation Date: 05-23-2017
Citation: 23 CCR 16 2636(f)(5) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(5)
Violation Description: "Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested annually: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC)."
Violation Notes: Returned to compliance on 05/23/2017. Float and chain for grade 91 dispenser 9/10 failed. Return to compliance: Repair and retest. Corrected at time of inspection. Chain adjusted.

SKYWAY GAS & FOOD (Continued)

S110818355

Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665

Violation Description: Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.

Violation Notes: Returned to compliance on 05/15/2018. All three spill buckets had liquid in them. The spill bucket for diesel was approximately half full. The other two spill buckets had 1" to 2" in them. Return to compliance: Have the liquid removed from the spill buckets. Corrected at time of inspection.

CERS ID: 10276348
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 68319
Site Name: SKYWAY GAS & FOOD
Violation Date: 05-23-2017
Citation: 23 CCR 16 2636(f)(5) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(5)
Violation Description: "Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested annually: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC)."
Violation Notes: Returned to compliance on 05/23/2017. Float and chain for grade 91 dispenser 9/10 failed. Return to compliance: Repair and retest. Corrected at time of inspection. Chain adjusted.
Violation Division: Butte County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 68319
Site Name: SKYWAY GAS & FOOD
Violation Date: 05-15-2018
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.
Violation Notes: Returned to compliance on 05/15/2018. All three spill buckets had liquid in them. The spill bucket for diesel was approximately half full. The other two spill buckets had 1" to 2" in them. Return to compliance: Have the liquid removed from the spill buckets. Corrected at time of inspection.

S109521493

Status Date: 06/17/2015
Global Id: T10000000902
Lead Agency: CENTRAL VALLEY RWQCB (REGION 5R)
Lead Agency Case Number: Not reported
Latitude: 39.7418938341936
Longitude: -121.791279315948
Case Type: Cleanup Program Site
Case Worker: BB
Local Agency: Not reported
RB Case Number: SLT5R1062
File Location: Regional Board
Potential Media Affected: Sediments
Potential Contaminants of Concern: Arsenic, Lead
Site History: On 22 May 2010, The City of Chico, Discharger, proposed to remove approximately 100 cubic yards of contaminated sediment from the South Branch of Dead Horse Slough. Sediment in the banks and bed of the slough were sampled by the City's consultant in January 2006, October 2006, and February 2010. Central Valley Water Board Staff (Staff) accompanied the City's consultant during the October 2006 event to collect split samples. Sediment concentrations concentrations of Antimony, Arsenic, and Lead in the sediment locally remain from the former Humboldt Road Burn Dump site. However, the sediments are non-hazardous for antimony and arsenic. Lead was not detectable in the de-ionized water waste extraction test (DI-WET) for the single sample which exceeded the soluble threshold limit concentration (STLC) criterion. The sediment is now inaccessible, bound within tree roots. Therefore, the sediment in its current condition does not present a threat to human health or the environment. Furthermore, if the highway widening project does not proceed, there is no regulatory basis for removal or further investigation. However, removal will become feasible during widening of State Highway 32 and the related extension of a box culvert. The case was closed with the conditions that: the Discharger notify staff within 30 days prior to commencement of any field work; that dredging of sediment be scheduled during the dry season and transported to a Class I or Class II Landfill; the Discharger obtains an appropriate permit pursuant to Title 23, CWC Section 2200(e); and that the field work follow the 22 May 2010 Remedial Action Work Plan (RAW) as approved by staff in our 25 June 2010 conditional concurrence letter.

Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Notes: Returned to compliance on 02/15/2017. Facility site map does not include all of the requirements in HSC 25505(a)(2) which requires all of the following: scale of map, north orientation, loading areas, parking lots, internal roads, adjacent streets, adjacent property use, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. Missing fire hydrants on the north and south of the area map, adjacent property use and emergency staging area. Return to compliance: Review and update your area map with the missing elements and submit to CERS. Notify me when you have updated your map.

Name: ROSS DRESS FOR LESS #0171
Address: 2485 NOTRE DAME BLVD STE 200
City,State,Zip: CHICO, CA 95928
Site ID: 62903
CERS ID: 10506022
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 62903
Site Name: Ross Dress For Less #0171
Violation Date: 10-02-2018
Citation: 40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description: Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers.
Violation Notes: Returned to compliance on 10/26/2018. Last weekly inspection of the hazardous waste area was conducted 4/6/2018. Return to compliance: Start doing weekly inspections and document. When you have two weeks of inspections send me a scan of the inspection sheets to dholochwost@buttecounty.net.
Violation Division: Butte County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 62903
Site Name: Ross Dress For Less #0171
Violation Date: 10-02-2018
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 10/26/2018. The following manifests were unavailable at the time of inspection: 001398454 PSC, 001531713 PSC and 001694392 PSC. The facility had the generator's initial copy of manifests 001166886 PSC and 001269904 PSC, but not the designated facility signed copies. The manifest for the first 2018 pickup also missing. Return to compliance: Obtain the designated facility signed copies of the manifests listed above. When you have obtained them,

Violation Source: CERS

Site ID: 62903
Site Name: Ross Dress For Less #0171
Violation Date: 10-02-2018
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 10/26/2018. The following containers were overfilled to the point they could not be closed: Both flammable aerosol containers and one of the toxic waste containers. Return to compliance: Close the containers when not adding to or removing waste. You may need to have a pickup of your hazardous waste or get more containers since the present container are overfilled. Send me a picture of the closed containers once you are able to close them to dholochwost@buttecounty.net.

Violations:

Site ID: 60018

Site Name: RALEY'S

Violation Date: 06-20-2017

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Notes: Returned to compliance on 07/05/2017. Map is missing emergency shutoffs for water, electricity and gas. Also missing are adjacent streets and emergency staging area. Return to compliance: Review and update your map with the missing content, and submit to CERS. Note: Map at facility is in color while the one uploaded to CERS is blacking and white. If you will be using color coding for items such as fire extinguishers and first aid kits, please upload a color map. If you stay with black and white, using symbols would be better. Also, if you abbreviate content please place the abbreviation/symbol into a legend. For example, you use PSC to indicate your hazardous waste handling area, but explanation of what the initials mean.

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.

Violation Notes: Returned to compliance on 09/26/2018. Facility missing the following Designated Facility signed manifests: 00720968FLE, 011412001FLE, and 010866711FLE. The initial manifests are present. Return to compliance: Obtain the Designated Facility signed manifests. You may have to contact either the waster hauler or the designated facility to get a copy of the manifests. Once you have them, send me scanned copies of the manifests to dholochwost@buttecounty.net.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 09/17/2018. Site map is missing fire extinguisher locations, existing fire extinguisher in incorrect location, the location of the hazardous materials and waste are incorrect, spill kit in incorrect location, location of HMBP/SDS not on map, and electrical panels not in the correct place and not on map. I left the site map from CERS with corrections with the report. Return to compliance: Update site map with the missing content and place existing content in correct place. Once updated, upload site map to CERS. Notify me when completed at dholochwost@buttecounty.net or 530-538-7145.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID: 2416
Site Name: AA DALES CHICO TRANSMISSIONS
Violation Date: 12-21-2017
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2

Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violation Notes: Returned to compliance on 03/15/2018. 3/15/2018: On 3/15/2018 I stopped by the business to determine if the facility was still in operation. This was due to previously calling the business to set up an inspection and receiving an automated message indicating that the phone had been disconnected or no longer in use. I found that AA Dales Chico Transmission was no longer in operation and that Spencer Automotive is now operating out of the location. The business was closed at the time of my visit so I was unable to make contact. I did find the new business' website which indicated that it started operating out of 2540 Dominic as of 2/5/2018. Dan Holochwost.

FINDS:

Registry ID: 110058255463

Environmental Interest/Information System
STATE MASTER

Registry ID: 110002665633

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002784470

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

the map that the runs are unknown. Return to compliance: Update UST Operating Application information in CERS and update plot map.
Butte County Environmental Health

Violation Division: UST
Violation Program: CERS
Violation Source:

Site ID: 116995
Site Name: TESORO (MOBIL) 58358
Violation Date: 01-23-2014
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double wall pressurized piping in the under dispenser containment to be continuously monitored by a method that either shuts down the flow of product to the dispenser or activates an audible/visual alarm when a leak is detected.
Violation Notes: Returned to compliance on 07/24/2014.

Violation Division: Butte County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 116995
Site Name: TESORO (MOBIL) 58358
Violation Date: 08-18-2016
Citation: 23 CCR 16 2631(g), 2632(c)(2)(A) & (B) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2631(g), 2632(c)(2)(A) & (B)
Violation Description: Failure of the double-walled interstitial space of the tank to be continuously monitored with an audible and visual alarm.
Violation Notes: Returned to compliance on 09/06/2016. Annular space sensor for regular unleaded 2 (north tank) was not operational. Corrective Action: Replace annular space sensor, re-test and submit passing test result. Inspection Note: This inspection was for new construction for piping, UDC's and trubine sumps. Since all sensors were tested and facility was inspected, this inspection will serve as the new due date for the annual monitoring certification, spill bucket testing, and line leak detector testing. Additionally, complete secondary containment testing was performed on this date. Therefore, this date will serve as the new due date for the triennial secondary containment testing. Please revise the monitoring plan in CERS to reflect the new construction at the facility within 30 days.

Name: TESORO (MOBIL) 58358
Address: 2501 NOTRE DAME BLVD
City,State,Zip: CHICO, CA 95928
Site ID: 116995
CERS ID: T0600776104
CERS Description: Leaking Underground Storage Tank Cleanup Site

Violations:
Site ID: 116995
Site Name: TESORO (MOBIL) 58358
Violation Date: 10-06-2017
Citation: HSC 6.7 25284(a)(3)(A) & (B); - California Health and Safety Code, Chapter 6.7, Section(s) 25284(a)(3)(A) & (B);
Violation Description: Failure to implement or maintain a written agreement between the UST permit holder and the operator (owner/operator agreement).
Violation Notes: Returned to compliance on 10/30/2017. Owner/operator written agreement missing on site. Personnel was unable to find the document. CERS indicates that the agreement is stored at the facility. Return to compliance: Upload the owner/operator written agreement to CERS. Butte County CUPA does not authorize this document to be stored at the facility.

Site ID: 116995
Site Name: TESORO (MOBIL) 58358
Violation Date: 10-06-2017
Citation: 23 CCR 16 2712(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(i)
Violation Description: Failure to have a UST Monitoring Plan available on site.
Violation Notes: Returned to compliance on 11/15/2017. Monitoring plan not found on site. Return to compliance: Have a copy of the monitoring plan on site. Once the copy of the plan is on site, please notify me at dholochwost@buttecounty.net.
Violation Division: Butte County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 116995
Site Name: TESORO (MOBIL) 58358
Violation Date: 10-06-2017
Citation: 23 CCR 6.7 25284, 25286 - California Code of Regulations, Title 23, Chapter 6.7, Section(s) 25284, 25286
Violation Description: Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes: Returned to compliance on 10/30/2017. Permit information needs to be updated. Facility has double walled fiberglass piping and not single walled fiberglass piping. Corrosion protection should all be marked "no". Secondary containment for tanks are fiberglass. Monitoring plot map is missing sensor listing with model numbers. Also missing on the plot map is the location of the piping runs. If you do not know the location of the piping runs it is better not to guess and indicate on the map that the runs are unknown. Return to compliance: Update UST Operating Application information in CERS and update plot map.
Violation Division: Butte County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 116995
Site Name: TESORO (MOBIL) 58358
Violation Date: 01-23-2014
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double wall pressurized piping in the under dispenser containment to be continuously monitored by a method that either shuts down the flow of product to the dispenser or activates an audible/visual alarm when a leak is detected.
Violation Notes: Returned to compliance on 07/24/2014.
Violation Division: Butte County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 116995
Site Name: TESORO (MOBIL) 58358
Violation Date: 08-18-2016

unleaded 2 (north tank) was not operational. Corrective Action: Replace annular space sensor, re-test and submit passing test result. Inspection Note: This inspection was for new construction for piping, UDC's and trubine sumps. Since all sensors were tested and facility was inspected, this inspection will serve as the new due date for the annual monitoring certification, spill bucket testing, and line leak detector testing. Additionally, complete secondary containment testing was performed on this date. Therefore, this date will serve as the new due date for the triennial secondary containment testing. Please revise the monitoring plan in CERS to reflect the new construction at the facility within 30 days.

Violation Division: Butte County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 116995
Site Name: TESORO (MOBIL) 58358
Violation Date: 05-15-2018
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)

Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.

Violation Notes: Returned to compliance on 07/16/2018. Facility has eight 20lb cylinders which converts to 1,398 cubic feet. This is over the reporting threshold for carbon dioxide which is 1000 cubic feet. The carbon dioxide was not previously disclosed in the facility's inventory. Return to compliance: Log into CERS and update your inventory to reflect the amount of carbon dioxide at the facility.

CERS:

Name: JIFFY LUBE
Address: 2452 NOTRE DAME BLVD
City,State,Zip: CHICO, CA 95928
Site ID: 39800
CERS ID: 10277344
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 39800
Site Name: JIFFY LUBE
Violation Date: 07-11-2016
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22,
Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A
container holding hazardous waste must always be closed during
storage, except when it is necessary to add or remove waste. (b) A
container holding hazardous waste must not be opened, handled, or
stored in a manner which may rupture the container or cause it to
leak.
Violation Notes: Returned to compliance on 07/25/2016.
Violation Division: Butte County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 39800
Site Name: JIFFY LUBE
Violation Date: 07-11-2016
Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter
6.67, Section(s) 25270.4.5 (a)
Violation Description: Failure to complete a review and evaluation of the SPCC Plan at least
once every five years, document the completion of the review, and sign
a statement as to whether the SPCC Plan will be amended.
Violation Notes: Returned to compliance on 07/25/2016. Five year review due (March
2016). Please review your SPCC plan.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID: 403854
Site Name: The Home Depot Store #6609
Violation Date: 03-15-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Notes: Returned to compliance on 03/20/2017. Site map for interior of facility is missing required elements. There are several eye wash stations not on the map (Receiving area [plumbed], customer service area, paints) and satellite accumulation area indicator for key cutting area. The eye wash station located on the map at the customer loading area has moved as well. The location of your treated wood waste container is outside behind the facility and needs to be placed on the map. Also place the location of your HMBP and MSDS on the map. Return to compliance: Review and update your map with the missing and moved elements, and submit to CERS. Note: Manager took a picture of the interior site map with the notes.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 10/20/2017. Refrigerant not listed on inventory. Refrigerant greater than 1000 cubic feet. Return to compliance: Update inventory to include refrigerant that is on site. Corrected at time of inspection.

Violation Division: Butte County Environmental Health

Violation Program: HMRRP

Violation Source: CERS

Site ID: 407193

Site Name: Walmart #2044

Violation Date: 10-20-2017

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)

Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.

Violation Notes: Returned to compliance on 10/20/2017. Missing manifest 000104113DAT from 11/05/2014. Missing TSDF copy of manifest 008571692FLE from 9/26/2016. Return to compliance: Acquire missing manifests. Corrected at time of inspection.

Violation Division: Butte County Environmental Health

Violation Program: HW

Property Description:	The 1.03-acre Site is located in an area of predominantly residential use with some open space adjacent to the north of Little Chico Creek. The Site was developed with a 1,434-square-foot, single-story main residence, a 384-square-foot secondary residence and a small shop/root cellar and a former well pump house. The former burn dump is in the northwestern portion of the Site and appears to extend offsite to the west. The onsite portion of the former burn dump is approximately

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

For Commercial Reuse: 0
For Industrial Reuse: 0
For Residential Reuse: 0
Unknown Type: 0
Alternate Address: HEGAN AND SKYWAY LANES
Alternate City,St,Zip: CHICO, CA 95828
Background Info: THE SITE IS LOCATED NEAR THE CENTER OF THE CITY OF CHICO, BUTTE COUNTY, CALIFORNIA. THE SITE CONSISTS PRIMARILY OF A GROUNDWATER PLUME WHICH EXTENDS FROM THE AREA OF THE INTERSECTION OF STATE HIGHWAY 99 AND COMANCHE CREEK TO AN AREA ABOUT TWO MILES SOUTHWEST NEAR THE INTERSECTION OF HEGAN LANE AND SCHOUTEN LANE. THE PLUME'S MAXIMUM WIDTH IS STILL UNKNOWN, BUT IT IS PROBABLY LESS THAN ONE HALF MILE. THE POLLUTION AT THIS SITE WAS DISCOVERED DURING THE SAMPLING OF THE SKYWAY SUBDIVISION HOMES IN NOVEMBER 2003. RESIDENTIAL WELLS SAMPLING WAS INITIATED BY THE CENTRAL VALLEY REGIONAL WATER QUALITY CONTROL BOARD (CVRQWCB) AS A RESULT OF LOCAL CONCERNS ABOUT THE ADJACENT TANK FARM AND POTENTIAL LEAKS OF PETROLEUM PRODUCTS AND METHYL TERTIARY BUTYL ETHER (MTBE). SAMPLING RESULTS WERE MADE AVAILABLE TO THE PUBLIC SHORTLY BEFORE THE END OF DECEMBER. OF THE 40 WELLS SAMPLED, 26 HAD DETECTABLE LEVELS OF SOLVENTS AND TEN HOMES EXCEEDED MAXIMUM CONTAMINANT LEVELS (MCLs). THE HIGHEST LEVEL OF TRICHLOROETHYLENE (TCE) WAS 18 PARTS PER BILLION (ppb), AND PERCHLOROETHYLENE (PCE) 1.4 PPB. THE RESPECTIVE MCLs FOR TCE AND PCE ARE 5 ppb. ADDITIONAL SAMPLING IN 2004 HAS SHOWN THAT THE PLUME EXTENDS AT LEAST ONE MILE TO THE SOUTHWEST AND ONE MILE TO THE NORTHEAST FROM THE SKYWAY SUBDIVISION.
Not reported
THE CONTAMINATION ORIGINATED FROM AN UNKNOWN UPGRADIENT SOURCE, WHICH WAS PROBABLY SOME TYPE OF MANUFACTURING FACILITY.
Not reported
THE RECEPTORS ARE THE CURRENT RESIDENTS, WHICH RELY ON GROUNDWATER AS THEIR SOURCE FOR DRINKING WATER. ADDITIONAL HOMES WITH RESIDENTIAL WATER WELLS ARE CURRENTLY BEING BUILT IN THE AREA.
Not reported
IN MARCH 2004, THE DEPARTMENT OF TOXIC SUBSTANCES CONTROL (DTSC) BEGAN A BOTTLED WATER PROGRAM FOR IMPACTED RESIDENTS AS A TEMPORARY SOLUTION TO LIMIT THEIR IMPACT FROM THE CONTAMINATION. AT THE SAME TIME, DTSC SENT INFORMATION REQUEST LETTERS TO SEVERAL BUSINESSES IN THE AREA TO BEGIN THE POTENTIALLY RESPONSIBLE PARTY (PRP) SEARCH. DTSC IS CURRENTLY PREPARING AN IMMINENT AND SUBSTANTIAL ENDANGERMENT (I&SE) DETERMINATION FOR THE SITE SO WE CAN MOVE FORWARD WITH THE SITE INVESTIGATION.

Program inspection. Reviewed HMBP forms including the business activities, business owner/operator, facility inventory, facility maps and the contingency plan. Business Operator stated that no reportable releases have occurred in the previous three years; did not observe signs of an obvious release. Consent to perform the inspection, review documents, copy documents, take photos or collect samples provided by Michael Chiotti at 9 AM on 8/15/2017. No photographs, copied documents or samples were obtained during this inspection.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2019	Source: EPA
Date Data Arrived at EDR: 11/07/2019	Telephone: N/A

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2019

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2019

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/25/2019	Source: EPA
Date Data Arrived at EDR: 11/07/2019	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (415) 495-8895
Date Made Active in Reports: 12/20/2019	Last EDR Contact: 12/16/2019

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

UST CLOSURE: Proposed Closure of Underground Storage Tank (UST) Cases

UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Latitude (North):	39.728156 - 39° 43' 41.36"
Longitude (West):	121.786291 - 121° 47' 10.65"
Universal Transverse Mercator:	Zone 10
UTM X (Meters):	604015.6
UTM Y (Meters):	4398080.5
Elevation:	270 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5603314 CHICO, CA
Version Date:	2012
North Map:	5603350 RICHARDSON SPRINGS, CA
Version Date:	2012
Northeast Map:	5603346 PARADISE WEST, CA
Version Date:	2012
Southeast Map:	5603320 HAMLIN CANYON, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

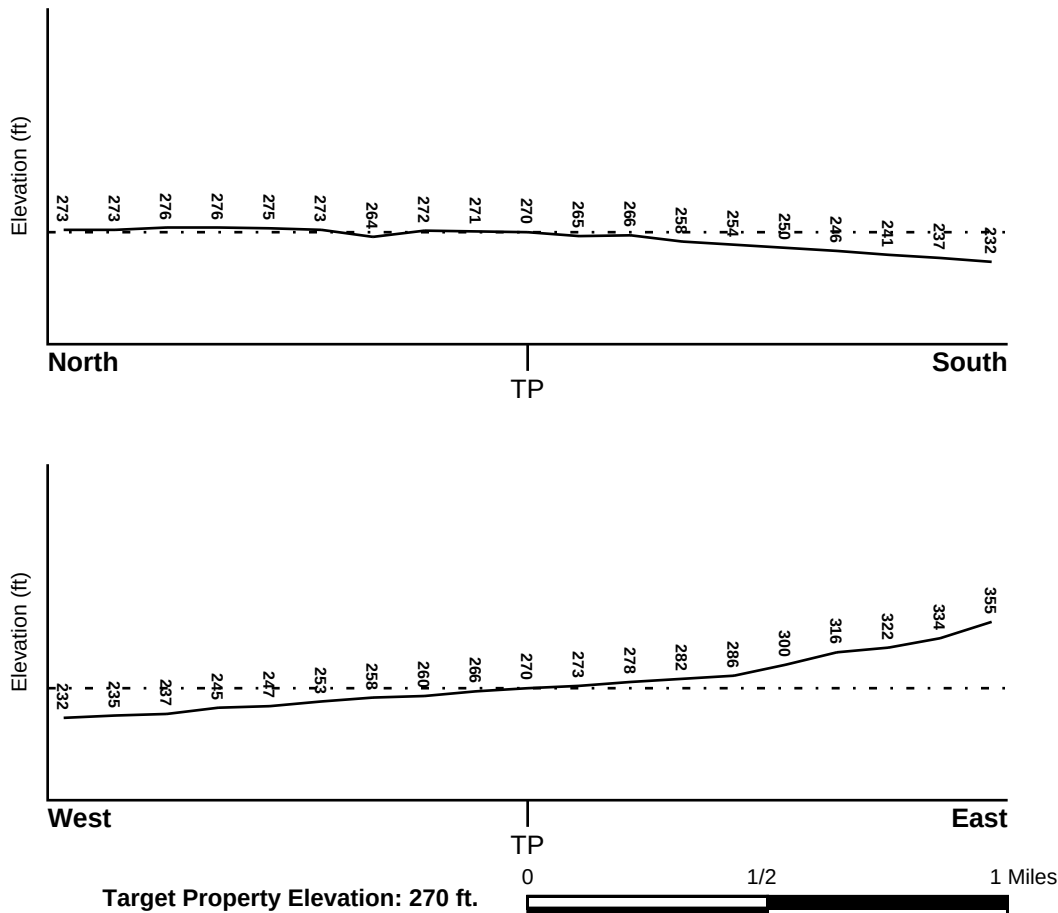

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06007C0506E	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06007C0510E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
CHICO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Tertiary
Series: Pliocene
Code: Tpc *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Continental Deposits

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: TUSCAN
Soil Surface Texture: cobbly - loam
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	10 inches	cobbly - loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 6.50 Min: 5.10
2	10 inches	17 inches	cobbly - clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.20 Min: 0.06	Max: 7.30 Min: 5.60
3	17 inches	22 inches	indurated	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: gravelly - clay
gravelly - loam
sandy loam

Surficial Soil Types: gravelly - clay
gravelly - loam
sandy loam

Shallow Soil Types: loam
sandy clay loam
clay loam

Deeper Soil Types: stratified

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

April 23, 2020

Ms. Claire Bromund
Project Manager
ICF
980 9th Street, Suite 1200
Sacramento, CA 95814

Subject: Addendum to the Initial Site Assessment
Bruce Road Widening Project
Chico, CA 95669

Dear Ms. Bromund:

Burleson Consulting, Inc. (Burleson) is pleased to submit this addendum to the report of our Initial Site Assessment (ISA) for the Bruce Road Widening Project in Chico, California. The purpose of our services was to characterize the project area right-of-way conditions relative to environmental contamination concerns and to identify obvious, actual, and potential concerns. Our scope of services was described in Burleson's February 3, 2020 Report of Initial Site Assessment, Bruce Road Widening Project Chico, California, Capital Improvement Project No. 16038 (Report)

This addendum to the Report is intended for use only by ICF, the City of Chico, and the California Department of Transportation. Our services have been performed under mutually agreed upon terms and conditions. If other parties wish to rely on this report, please have them contact us so that a mutual understanding and agreement of the terms and conditions for our services can be established prior to their use of this information.

The findings contained herein are based upon the revised project description provided to Burleson via electronic mail on April 16, and April 23, 2020, data that were reviewed and documented in the Report along with our experience on similar projects. The discovery of any additional information concerning the environmental conditions at the site should be reported to us for our review so that we can reassess potential environmental impacts and modify our conclusions, if necessary.

Revised Project Description.

Minor changes to the project description include greater detail regarding the anticipated nature of landscaping, sub-grade utilities associated with traffic controls, and runoff controls. These minor changes do not appear to modify the depths or extents of excavation associated with the project, nor do they describe new activities as compared to the project evaluation in the Phase I ESA. These minor changes do not affect the Phase I ISA findings. This addendum focusses on the following activities that appear to be additions to the project since the Report was prepared:

- 1) Replacing an existing path east of Bruce Road from Humboldt Road to Native Oak Drive.
- 2) Addition of construction activity along East 20th Street, East of Bruce Road
- 3) Excavation to install a storm water conveyance west of Bruce Road across the future Chico Unified School District (CUSD) high school site.

Initial Site Assessment

Environmental ISA for each of these new activities is described below.

Replacing the Existing Path East of Bruce Road from Humboldt Road to Native Oak Drive. Replacing the existing path was not explicitly described in the earlier project description. The path was constructed in the vicinity of the former Humboldt Road Burn Dump. Because existing records indicate that burned material containing elevated levels of metals remained in the subsurface in proximity to Bruce Road after remediation, the potential exists for encountering soils containing elevated metals during pavement replacement in this area. Due to historic evidence, proximity to project related construction activity, and the level of ground disturbing activity anticipated as part of the project in this vicinity (excavation up to 3-feet depth), Burleson has identified the Humboldt Road Burn Dump as a high-risk recognized environmental condition (REC) to this project feature.

Addition of construction activity along East 20th Street, East of Bruce Road. This work will impinge upon vacant land to the north and south of existing East 20th Street. The land to the north has been used for storm water control during residential construction based on review of historical aerial photographs and regulatory records review. A small structure, possibly a pump house was present to the southeast of the intersection based on aerial photograph review. The structure was present in the 1941 through 1969 aerial photographs. Based on review of these historical records, Burleson does not consider there to be a REC to the project as described at this area.

Excavation to install a storm water conveyance west of Bruce Road at the future Chico Unified School District (CUSD) future high school site. The alignment of the storm water conveyance provided in the revised project description and shown on the revised project limits figure (attached) traverses undeveloped land formerly used for agriculture and is adjacent to existing residential and light commercial developed parcels. Two options for the alignment are being considered. Neither alignment impinges on any known properties with a recognized environmental condition identified in the historical records.

Burleson's findings, recommendations, and conclusions remain unchanged. Burleson recommends that the City of Chico conduct a site investigation consisting of soil sampling in the project area north of Humboldt Road to determine if burn ash is present within the project limits. Soil samples from select locations should be collected for visual examination and laboratory analysis. Analytes should include total and leachable arsenic, lead, and zinc. Soil sampling should be planned in cooperation with Regional Board staff.

We appreciate the opportunity to be of service to you. Please call me at 916-984-4651, extension 111, or via electronic mail at gr@burlesonconsulting.com if you have any questions or if we may be of further service.

Sincerely,

Gregory J. Reller, P.G.
Professional Geologist
